

ELECTRO A.D. carries out its design, manufacture, marketing and after-sales service of diaphragm vacuum pumps and compressors for air and liquids. The company develops its activity in a changing and globalized environment in which the excellence of production, service and management are a necessary requirement for competitiveness, survival and development.

To achieve our short, medium and long term goals we have developed a Quality, Environmental and Occupational Risk Prevention Management System that will allow us to increase the safety of our processes and the quality of our products and services to achieve:

- Compliance with applicable legal and regulatory requirements as well as those of the customer and other interested parties.
- The optimization of the resources employed.
- The complete satisfaction of our customers.

This way we establish a framework that encourages the integration of all our employees, the collaboration with our suppliers and, as a result, generate the necessary information to continuously improve the effectiveness of our Quality, Environmental and Occupational Risk Prevention Management System.

It is of great importance for the proper operation of our company the continuous improvement through the optimization of processes, resources and technologies.

Management also acquires the commitment to provide all the necessary material and human resources to carry out the Integrated Policy of the company.

This is the Policy of Quality, Environment and Prevention of Occupational Risks that must be communicated and understood at all levels of the company.
